

Ayush Gupta | Software Engineer

Pune, Maharashtra, India

☎ +91-7985565525 • ✉ mrayushg08@gmail.com • 🌐 theayushgupta08.online

Professional Summary

Results-driven AI/Software Engineer with experience in Java & Python development, AI workflows, backend engineering, and problem-solving. Skilled in evaluating algorithmic correctness, designing computational logic, preventing computational failures across microservices, and building scalable software solutions. Strong understanding of Computer Science fundamentals including Data Structures, Algorithms, Databases, and System Design. Passionate about AI evaluation, reasoning validation, and mathematical problem modeling. Experienced in working with modern development stacks and collaborating in professional software environments.

Technical Skills

Languages: Python, Java, SQL, TypeScript, JavaScript

Backend: Node.js, Express.js, REST APIs

Database: MySQL, PostgreSQL, PGVector (Vector Database)

Concepts: LLM APIs (OpenAI/Anthropic), RAG, Embeddings, LlamaIndex, Spark, Hadoop, ETL pipelines, Agentic AI

Cloud & Tools: AWS, Vercel, Redis, Git, GitHub, JIRA, Postman, Linux, LangChain, Docker

Professional Experience

Raja Software Labs

Software Engineer

Pune

Feb 2026 – Present

- Debugged and fixed API communication issues across microservices, preventing system failures and improving overall backend reliability.
- Ensured secure data transfer by fixing backend bugs where authentication metadata and request payloads were being dropped during API handoffs.
- Restored distributed tracing and observability tools, allowing the engineering team to successfully track API requests from start to finish.
- Resolved critical service-integration bugs within a highly distributed system, significantly reducing request failures for downstream applications.

Sqano Systems Pvt Ltd

Software Engineer

Pune

Jun 2025 – Nov 2025

- Working on enterprise-level software solutions and backend systems.
- Developing scalable APIs and optimizing application performance.
- Writing clean, maintainable, and production-grade code using modern engineering practices.
- Collaborating with cross-functional teams for feature delivery and debugging.
- Applying strong problem-solving skills to technical and logical challenges.

Projects

BillOS – AI-Powered Billing SaaS:

- Developed an AI-powered billing SaaS platform to automate invoice and business document management.
- Built an AI assistant that answers user queries using uploaded business documents through Retrieval-Augmented Generation (RAG).
- Implemented document upload, text extraction, chunking, embedding generation, and semantic search using pgvector.

- Integrated LLM APIs to provide context-aware and accurate responses from business documents.
- Developed REST APIs using FastAPI for invoice, customer, and document management.
- Designed and optimized a PostgreSQL database for scalable data storage.
- Built responsive user interfaces using Next.js, React, and Tailwind CSS.
- Implemented secure authentication and role-based access control..

Vastraluxe – AI-Powered Fashion E-commerce Platform [[Link](#)]:

- Developed an AI-powered fashion e-commerce platform using Next.js, React, TypeScript, and Tailwind CSS.
- Integrated AI features to improve product discovery and enhance the shopping experience.
- Built responsive product catalog, search, filtering, shopping cart, and checkout modules.
- Implemented secure user authentication and account management.
- Connected frontend components with backend APIs for real-time product and order management.
- Optimized application performance and created reusable UI components for scalability.

Education

Indira College of Engineering and Management <i>Bachelor of Engineering in Computer Engineering, Grade: 8.4 / 10</i> Relevant Coursework: Data Structures, Algorithms, Artificial Intelligence, Database Management Systems, Operating Systems, Computer Networks.	Pune 2021 – 2025
Surmount International School <i>12th, Grade: 77%</i>	Gorakhpur 2020
Surmount International School <i>10th, Grade: 85%</i>	Gorakhpur 2018

Certifications

- Python Programming Certification
- Data Structures & Algorithms
- AI / Machine Learning Fundamentals
- SQL and Database Management

Interests

Artificial Intelligence, Backend Engineering, System Design, Research, Content Creation, Open Source
